**JOINT AQUATIC RESOURCES PERMIT APPLICATION FORM (JARPA)**

(for use in Washington State)

PLEASE TYPE OR PRINT IN BLUE OR BLACK INK

Based on the instructions provided, I am sending copies of this application to the following: *(check all that apply)*

- ☐ Local Government for shoreline: ☐ Substantial Development ☐ Conditional Use ☐ Variance ☐ Exemption ☐ Revision  
☐ Floodplain Management ☐ Critical Areas Ordinance
- ☐ Washington Department of Fish and Wildlife for HPA
- ☐ Washington Department of Ecology for: ☐ Approval to Allow Temporary Exceedance of Water Quality Standards (to Regional office);  
☐ 401 Water Quality Certification Nationwide Permits (to Headquarters office)
- ☐ Washington Department of Natural Resources for: ☐ Aquatic Resources Use Authorization Notification
- ☐ Corps of Engineers for: ☐ Section 404 ☐ Section 10 permit
- ☐ Coast Guard for: ☐ Section 9 Bridge Permit

**SECTION A - Use for all permits covered by this application. Be sure to also complete Section C (Signature Block) for all permit applications.**

# WASHINGTON JOINT AQUATIC RESOURCE PERMITS APPLICATION (JARPA)

## INSTRUCTIONS, SAMPLE DRAWINGS & AGENCY CONTACTS

This Joint Application may be used to apply for Hydraulic Project Approvals, Shoreline Management Permits, Approvals for Exceedance of Water Quality Standards, Water Quality Certifications, Coast Guard Bridge Permits, Department of Natural Resources Use Authorization, and Army Corps of Engineers Permits. ***You must submit readable copies of the completed application form together with detailed drawings, prepared in accordance with the drawing guidance to the appropriate agencies. When applying, you do NOT need to send copies of the instructions.*** Remember, depending on the type of project you are proposing, other permits may be required that are not covered by this application.

☞ Use the following list to determine which permits to apply for. Your project may require some or all of these permits. If you have trouble deciding which permits you need, please contact the appropriate agency for questions. Agency telephone numbers are attached. **IF ANY OF THE BULLETED ITEMS LISTED UNDER A PERMIT TITLE APPLY TO YOUR PROJECT, THEN YOU MUST CHECK THE BOX FOR THAT PERMIT ON THE TOP OF PAGE ONE OF THE JARPA FORM.** Complete Sections A & C for any of the permits listed below. Also complete Section B for Shoreline and Army Corps of Engineers permits. Detailed drawings are required for any of these permits (see attached drawing guidelines for drawing requirements).

- ◆ **Hydraulic Project Approval** from the Department of Fish and Wildlife under 75.20 RCW is required if your project includes construction or other work, that:
  - will use, divert, obstruct, or change the natural flow or bed of any fresh or salt water of the state. This includes all construction or other work waterward and over the ordinary high water line, including dry channels, and may include projects landward of the ordinary high water line (e.g., activities outside the ordinary high water line that will directly impact fish life and habitat, falling trees into streams or lakes, etc.).
- ◆ **Shoreline Substantial Development, Conditional Use, Variance Permit, or Exemption** from Local Government (under the Shoreline Management Act, 90.58 RCW;) required for work or activity in the 100-year floodplain, or within 200 feet of the ordinary high water mark of Shorelines of the State (check with your local government); and which includes any one of the following:
  - dumping;
  - drilling;
  - dredging;
  - filling;
  - placement or alteration of structures (whether temporary or permanent); or
  - any activity which substantially interferes with normal public use of the waters regardless of cost.
- ◆ **Floodplain Management Permits and/or Critical Areas Ordinances** review by Local Government for:
  - work in frequently flooded areas, geologically unstable areas, wildlife habitats, aquifer recharge areas, and wetlands.
- ◆ **Section 401 Water Quality Certification** from the Department of Ecology Headquarters office under 33 USC § 1341 is needed when a federal approval is required for a project, including the following:
  - Corps of Engineers Nationwide Permit--Send to Ecology's Environmental Coordination Section;
  - FERC hydropower license--Attach FERC exhibit E and send to Ecology's Water Resources Program; and
  - A Corps of Engineers Individual permit--Send only to Corps of Engineers; the Corps will notify Ecology.
- ◆ **Approval to Allow Temporary Exceedance of Water Quality Standards** from the Department of Ecology Regional office, under 90.48 RCW, if your project results in:
  - a temporary exceedance of water quality criteria established by WAC 173-201A for in water work (e.g., changes in turbidity from sediment disturbances and pH changes from concrete curing) -- send to Ecology's regional office. (**NOTE:** Application of aquatic herbicides and pesticides are covered by a separate application).
- ◆ **Aquatic Resources Use Authorization Notification** from the Department of Natural Resources is required if your project:
  - is on, crosses, or impacts the bedlands, tidelands or shorelands of a navigable water.
- ◆ **Section 404 Permit** from the Corps of Engineer under 33 USC § 1344 is required if your project includes:

- discharge or excavation of dredged or fill material waterward of the ordinary high water mark, or the mean higher high tide line in tidal areas, in waters of the United States, **including wetlands**;
  - mechanized land clearing in waters of the United States, **including wetlands**.
- ♦ **Section 10 Permit** from the Corps of Engineer is required for:
- any work in or affecting navigable waters of the United States (e.g., floats, piers, docks, dredging, piles, buoys, overhead power lines, etc.).
- ♦ **Section 9 Permit** from the Coast Guard is required for:
- construction of a new bridge or modification to an existing bridge over a navigable waterway.

#### USEFUL DEFINITIONS

*The following definitions are presented to help applicants in completing the JARPA. They may not necessarily represent specific language from the laws implemented through JARPA.*

Ordinary High Water Mark or Line means the visible line on the banks where the presence and action of waters are so common as to leave a mark upon the soil or vegetation: Provided, that in any area where the ordinary high water line cannot be found the ordinary high water line adjoining saltwater shall be the line of mean higher high water and the ordinary high water line adjoining freshwater shall be the elevation of the mean annual flood.

Mean Lower Low is the 0.0 tidal elevation, determined by averaging each day's lowest tide at a particular location over a period of 19 years. It is the tidal datum for vertical tidal references in the salt water area.

Mean High Water and Mean Higher High Water Tidal Elevations at any specific location can be found in tidal benchmark data compiled by the United States Department of Commerce, Environmental Science Services Administration, Coast and Geodetic Survey, dated January 24, 1979. This information can be obtained from the Corps of Engineers at (206) 764-3495. The determination of tidal elevation is obtained by averaging each day's highest tide at a particular location over a period of 19 years, measured from mean lower low water, which equals 0.0 tidal elevation.

Shorelands or shoreland areas means those lands extending landward for two hundred feet in all directions as measured on a horizontal plane from the ordinary high water mark; floodways and contiguous floodplain areas landward two hundred feet from such floodways; and all wetlands and river deltas associated with the streams, lakes, and tidal waters which are subject to the provisions of 90.58 RCW.

Shorelines means all water areas of the state, including reservoirs, and their associated wetlands, together with the lands underlying them, except stream segments upstream of the point where mean annual flow is less than 20 cubic feet per second, and lakes less than 20 acres in size.

Wetlands means areas that are inundated or saturated by surface water or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Bridge means any structure including pipelines and conveyor belts, which transports traffic or materials across a navigable water.

Aquatic Tidelands means the area between the ordinary high tide line and extreme low tide line, unless otherwise established.

Aquatic Shorelands means the shore areas of non-tidal navigable lakes or rivers between the ordinary high water line and the line of navigability unless otherwise established.

Aquatic Bedlands means the area waterward of and below the line of navigability on non-tidal rivers and lakes, or below the extreme low tide mark in navigable tidal waters, or below the outer harbor line where a harbor has been created.

Nationwide Permit issued by the Corps of Engineers for projects with minimal impacts. For a complete packet of nationwide permits and application information, contact the Corps Regulatory branch at (206) 764-3495.

## GUIDANCE FOR COMPLETION OF DRAWINGS

General Information. Three types of illustrations are needed to properly depict the proposed activity: Vicinity Map, Plan View, and Cross-Sectional View. Drawings to scale should be prepared using clear printing, black ink, and the fewest number of sheets possible. Include the scale. The importance of clear accurate drawings cannot be overstated. At a minimum, drawings must contain the following information; other information may be required depending on project type. If you have questions regarding completing the drawings, call the appropriate agency.

1. Vicinity Map. A copy of a county or city road map, or a U.S. Geological Survey topographic map may be used. Include:

- a. North arrow.
- b. Name of waterbody (and river mile if appropriate).
- c. Location of the proposed activity (indicate with a circle, arrow, X, or similar symbol).
- d. Provide latitude and longitude of the site to the nearest second.
- e. Provide directions to the site.

2. Plan View. This drawing illustrates the proposed project area as if you were looking down at the site from overhead.

- a. North arrow.
- b. Name of waterbody and direction of water flow.
- c. Location of existing shoreline.  
Tidal Waters: Show the Ordinary High, Mean High, Mean Low, Mean Higher High, and Mean Lower Low Water Marks or Lines, and/or wetland boundaries. Indicate elevation above datum.  
Non-tidal waters: Show the Ordinary High Water Mark or Line, Meander Line, and/or wetland boundary.
- d. Dimensions of the activity or structure and impervious surfaces, distance from property lines, and the distance it extends into the waterbody beyond the Ordinary High, Mean High, Mean Higher High, and Mean Low Water Mark or Line, and/or wetland boundaries, as appropriate.
- e. For Corps permits, indicate the distance to Federal projects and/or navigation channels (if applicable). To ascertain, call the Corps Regulatory Branch Office at (206) 764-3495.
- f. Show existing structures on subject and adjoining properties.
- g. Indicate adjoining property ownership.
- h. If fill material is to be placed, identify the type of material, amount of material (cubic yards), and area to be filled (acres).
- i. If project involves dredging, identify the type of material, amount of material (cubic yards), area to be dredged, method of dredging, and location of disposal site. Dredging in areas shallower than -10 feet needs to be clearly identified on drawings.
- j. Identify any part of the activity that has been completed.
- k. Indicate types and location of aquatic, wetland, riparian and upland vegetation.
- l. Erosion control measures, stabilization of disturbed areas, etc.
- m. Utilities, including water, sanitary sewer, power and stormwater conveyance systems (e.g., bioswales).
- n. Indicate stormwater discharge points.
- o. Proposed landscaping where applicable (for complex landscape plans, please attach a separate drawing).
- p. Where applicable, plans for development of areas on or off site as mitigation for impacts associated with the proposal.
- q. On all variance applications the plans shall clearly indicate where development could occur without approval of a variance, the physical features and circumstances on the property that provide a basis for the request, and the location of adjacent structures and uses.

3. Cross-Sectional View. This drawing illustrates the proposed activity as if it were cut from the side and/or front. Include:

- a. Location of water lines.  
Tidal Waters: Show the Ordinary High, Mean High, Mean Higher High, and Mean Lower Low Water Marks or Lines, and/or wetland boundary.  
Non-tidal waters: Show the Ordinary High Water Mark or Line, and/or wetland boundary.
- b. Water depth or tidal elevation at waterward face of project.
- c. Dimensions of the activity or structure, and the distance it extends into the waterbody beyond the Ordinary High, the Mean High, the Mean Higher High and Mean Low Water Mark or Line, and/or wetland boundaries.
- d. Indicate dredge and/or fill grades as appropriate.
- e. Indicate existing and proposed contours and elevations.
- f. Indicate types and location of aquatic, wetland, and riparian vegetation present on site.
- g. Indicate type and location of material used in construction and method of construction.
- h. Indicate height of structure.

4. Clearance and Elevations. Applies to Coast Guard Bridge Permits only.

- a. Vertical clearance measured from Mean Higher (tidal waters) or Ordinary High (non-tidal water).
- b. Horizontal clearance between piers or pilings.
- c. Bottom elevation of the waterway at the bridge.
